RELEASE 2 MARKS

Following are the results of your final project marking.

The project was tested in Android Studio with the following setup:

Android studio version: Ladybug feature drop 2024.2.2

Compile SDK: 35

Min SDK: 24

Target SDK: 35

Java Version: 11

Gradle plugin version: 8.8

Gradle version: 8.10.2

In some cases where the project failed to build using Ladybug, it was tested using Narwal.

After cloning a fresh copy of your repository, features were tested in order that they appear in the "Done" column on your group's Trello board. Testing terminated when a feature that failed to pass the "happy path" was encountered.

Each feature was marked as follows:

zero (0)--Missing, or not graded due to earlier failures.

51 pts--Not really: present, but fails happy path.

59 pts--Somewhat: fails boundary values or devious input.

63 pts--Mostly: no failures, but some rough spots.

71 pts--Mostly: no failures.

79 pts--Definitely: no failures, but not quite ready for Play Store.

95 pts--Excellent: no failures, Play Store ready.

Extra features were considered only if all other features achieved "Mostly." Additionally, extra features only result in extra credit if they are marked "Mostly."

Most of your "features" are parts of actual end-to-end features, as noted below.
